NOSHOK

Measurement Solutions With Measurable Results

3 Year Warranty

Intelligent Tank & Silo Pressure Transmitters
FOR THE FOOD & BEVERAGE INDUSTRY

9 KEY ADVANTAGES

1 — Exclusive design positions pressure & temperature sensors close to the media directly behind the diaphragm

Allows active and rapid temperature compensation which provides faster, more accurate readings

2 — Unique compact diaphragm

Provides increased strength and durability over larger diaphragms, delivering long life and reducing potential for damage

3 — Turn down ratios up to 10:1

Allow more flexibility in ranges and reduces required inventory

4 — 360° rotatable display

Provides flexibility and readability in multiple mounting positions

5 — Accuracy 0.1% based on adjusted span, not full scale

Provides higher accuracy regardless of the range selected

6 — Easy programming via on-board display

No reference pressure is required for range adjustment

7 — All spud process connections available (Anderson- Negele, E+H, KING-GAGE, Rosemount, Tank Mate)

Direct fit to the shell installed, no adaptors or equipment adjustments required

8 — The same programming is used for all of these NOSHOK transmitters

No additional training or potentiometers required

9 — All Stainless Steel construction, including housing

Durable, hygienic, meets the requirements of 3-A

NOSHOK Has Acquired KING-GAGE A NOSHOK Company

Intelligent Tank & Silo Pressure Transmitters
FOR THE FOOD & BEVERAGE INDUSTRY

20 SERIES
Intelligent Silo & Tank Level Sanitary Pressure Transmitter

- NOSHOK can provide every connection available with no adaptors needed
- Vent plug located on the back of the sensor head is easily popped out and replaced
- CIP & SIP

25 SERIES
Intelligent Pressure & Level Transmitter

- Tri-Clamp® connection
- Ideal for balance tanks as the active temperature compensation provides very fast readings and reduces the potential for overflows
- CIP & SIP

30 SERIES
"SNORKEL" Pressure & Level Transmitter

- Developed for wash down applications and where space restricts easy adjustment
- Electronics remotely mounted for convenience and safety
- CIP & SIP

Custom cable lengths | ***Custom engineered process connection solutions*** | ***Optional diaphragm materials***
