PVC DIAPHRAGM SEAL

Model S3000

PVC Diaphragm Seal	
BR-D-3000	¼" FNPT x ¼" FNPT
BR-D-3001	¼" FNPT x ½" FNPT

MODEL S3000

FEATURES:

The Model S3000 from Blue Ribbon Corporation is a Teflon diaphragm seal or isolation device with PVC construction, used to provide economical protection of pressure sensing instrumentation from measured media. This Series is particularly useful for the economical protection of instrumentation from corrosion and clogging, and offers an option for application where some materials may be limited by corrosion.

SPECIFICATIONS:

- **Housing:** PVC
- **Diaphragm:** PTFE
- **Operating Pressure:** Vacuum to 200 PSI
- **Instrument Connection:** ¼" NPT
- **Process Connection:** ¼" and ½" NPT
- **Process Temperature:** +77 °F to +104 °F)
